OUR SACRED CONTAINER

•NORTH. •

Earth element, Winter, Midnight
Cleansing cold harsh winds, Gnome elemental
Mountains, Crystals & Rocks, Stillness, Quiet
Wisdom, Ancient Knowledge, Purity,
Higher Mind Consciousness,
Patience and Endurance through
overcoming hardships
Abundance, Old Age
Death, Owl,
Moose

North

- *Spirits of the East, gentle winds and sunrise light, we call to you now. Bring clarity, insight and the spark of new beginnings into this circle. Guardians of Air and vision, surround us with your sacred breath.*
- *Spirits of the South, fire of midday and abundance, we call to you. Ignite our passions and creative power. Teach us courage, warmth and the strength of community under the noonday sun.*
- *Spirits of the West, waters of dusk and deep healing, we call to you. Wash away what no longer serves and honor the cycles of endings and renewal. Guide us through the waters of our dreams.*
- *Spirits of the North, earth and ancient light, we call to you. Ground us in wisdom, resilience and the knowledge of our ancestors. Keep us strong and steady in the heart of this circle.*
- *Great Above, sky and star worlds, we call to you. Shower us with inspiration and cosmic guidance. Protect this sacred space from above.*
- *Great Below, Mother Earth, we call to you. Bless us with stability, growth and your deep nurturing presence. Seal this circle in your eternal earth.”“At the center stands the Heart of all, we honor you. May our intentions be clear, and may this space be fully alive with spirit.*

Honoring the Ancient Wisdom Keepers, mirrors an honoring of your own innate wisdom

Call to the Ancients

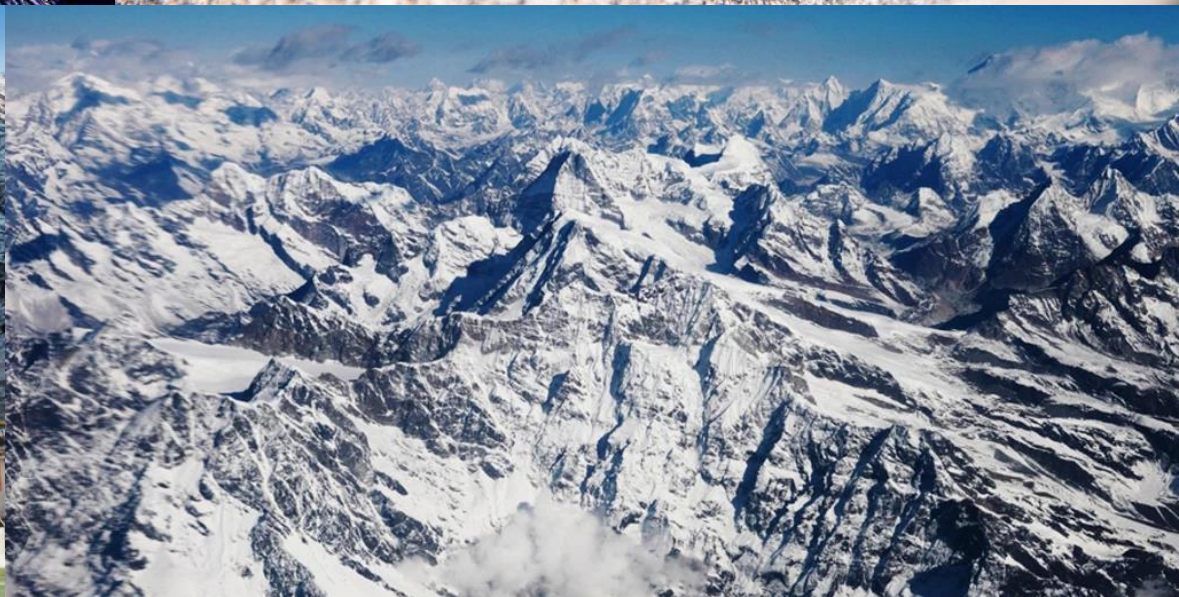

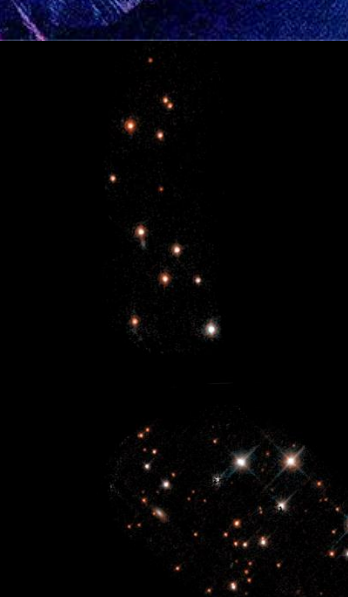

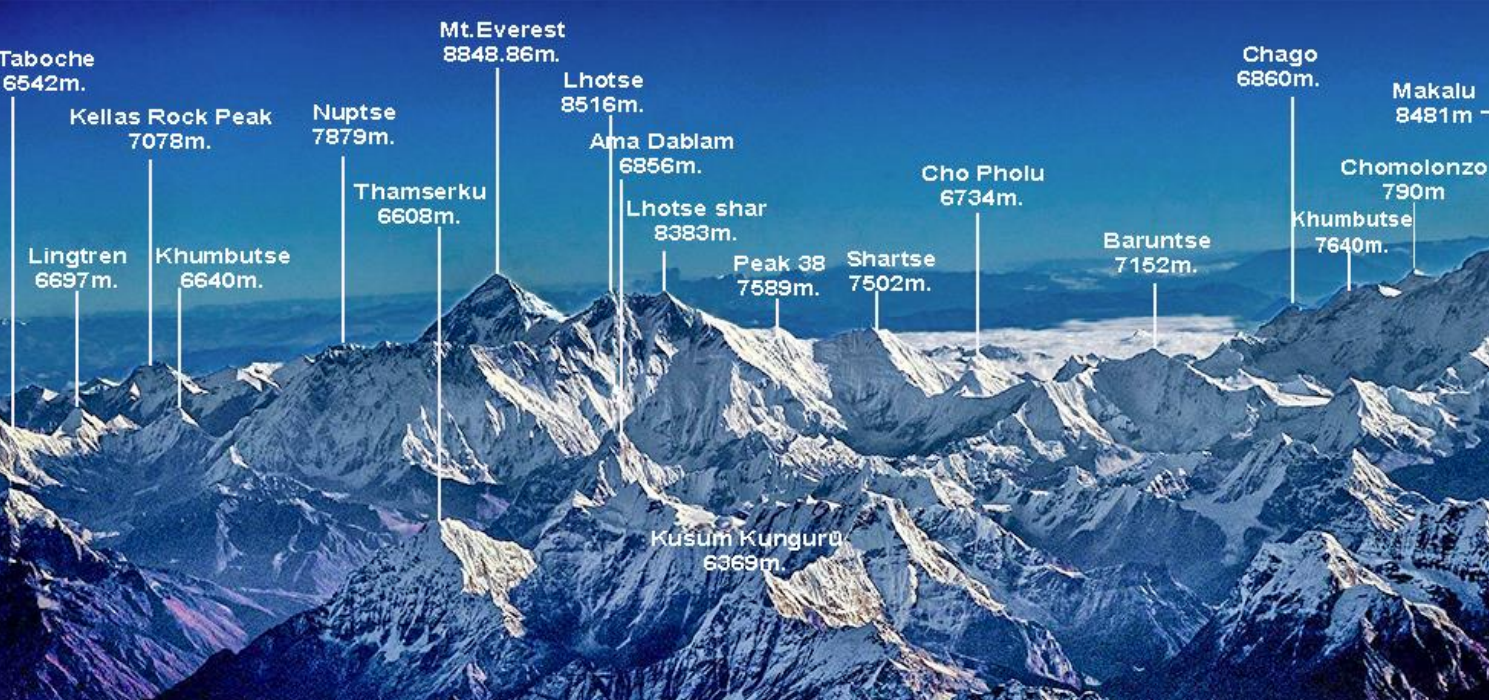

by Ohana T Martin

**Grandmother, Grandfather, please open up the door
Ancient Spirits, Elder Beings, take us to the time before
This madness ruled the Earth
When all things were in balance
Oh take us back there soon,
And help us heal the wounds of the people
And help us heal the wounds of the people**

**Earth Mother, She's crying saying when will you learn
Sky Father, He's threatening with a fire that will burn
This sadness from our hearts, that comes from the greed
Keeping us apart, when all we really need is to love
When all we really need is to love**

Is to love, is to lo....ve, when all we really need is to love

Kedarnath Temple, one of the twelve Jyotirlingas of Lord Shiva, is nestled in the Garhwal Himalayas at an altitude of 3,583 meters.

Mt McGloughlin

Mt Shasta

Crater Lake

Mt Ashland

The earth body functions as the **Sacred Crystal Heart** complex for the entire Solar System, and thus it is more important now than ever for humanity to consciously work to open their hearts in order to elevate the entire planet, which even raises the consciousness in the worlds that exist beyond.

The Earth is a gateway
A portal, a living breathing vehicle
A receiver & giver of information
An amplifier
An opening to your own awakening through
Connecting with your heart consciousness

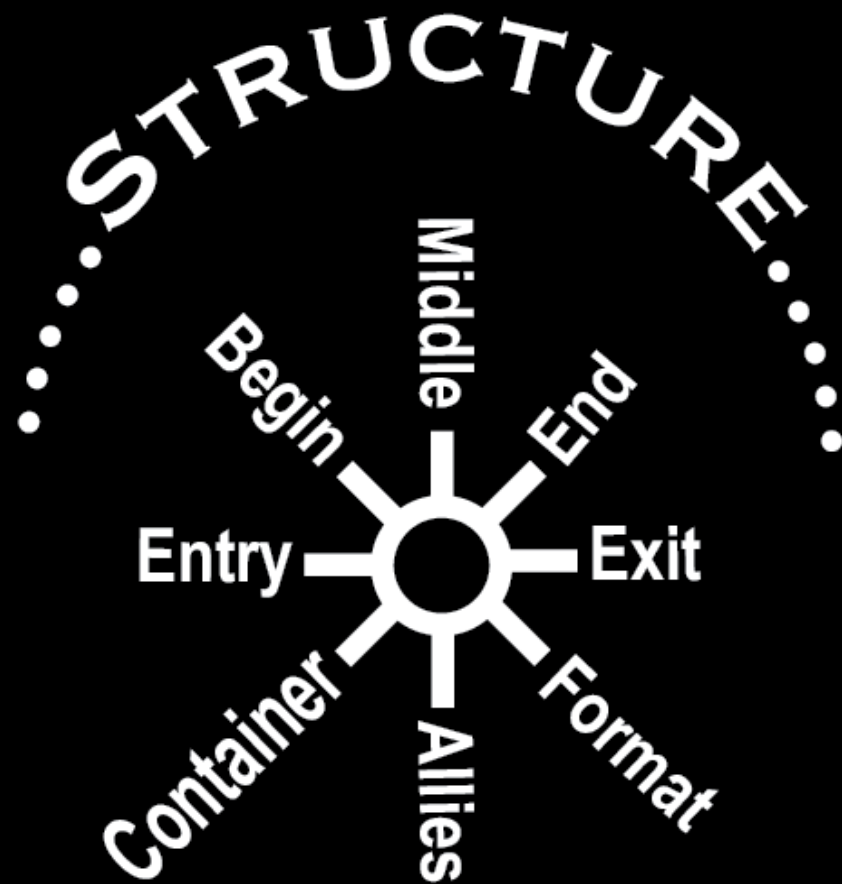

Planet Gridwork

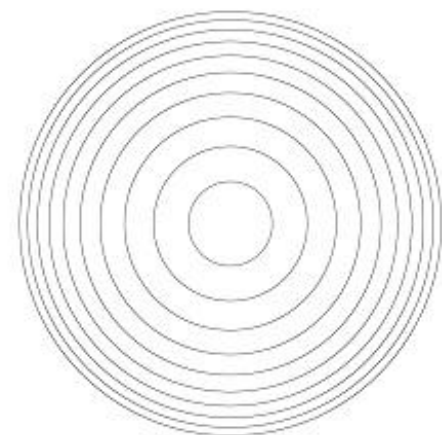

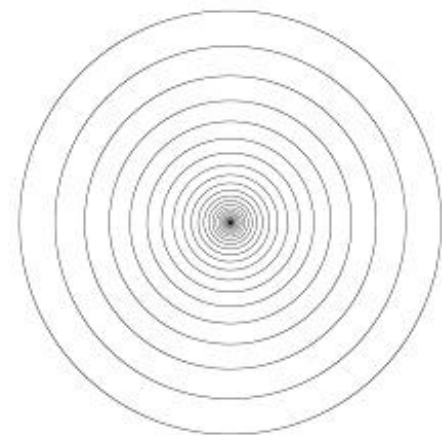

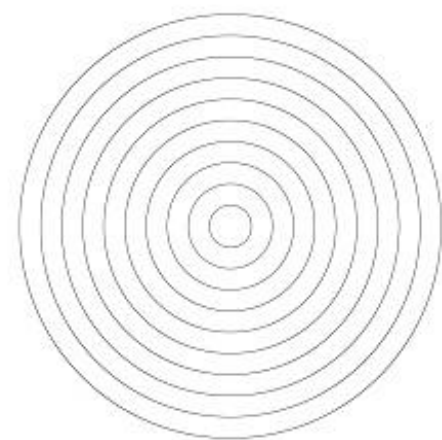

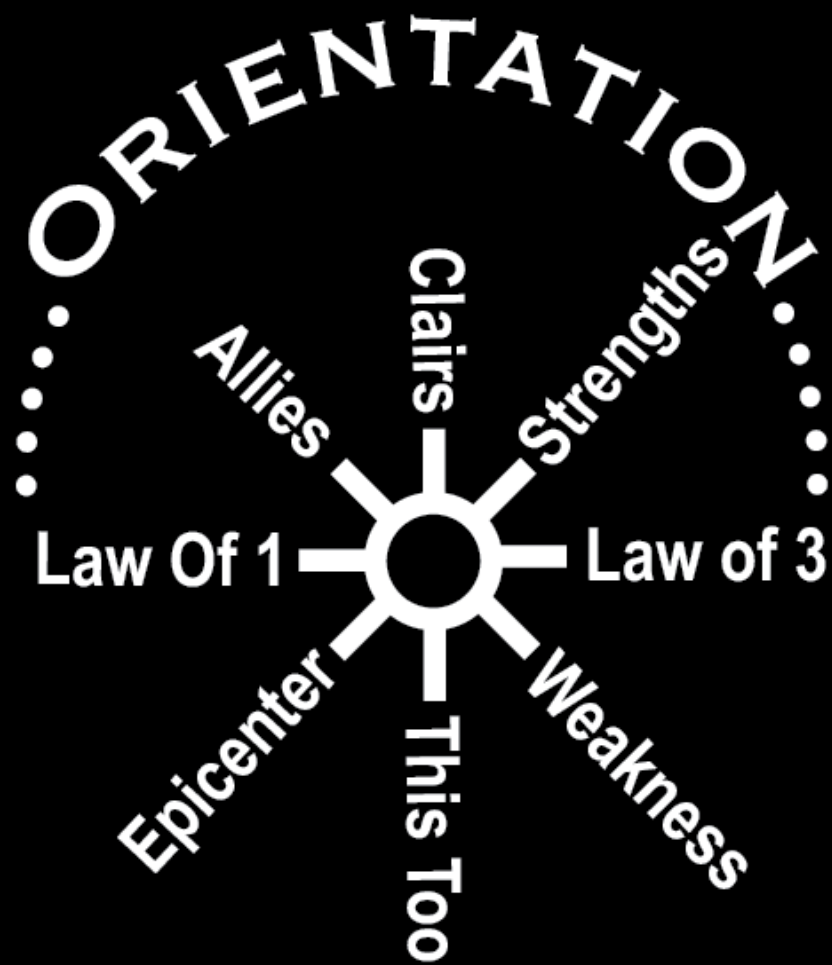

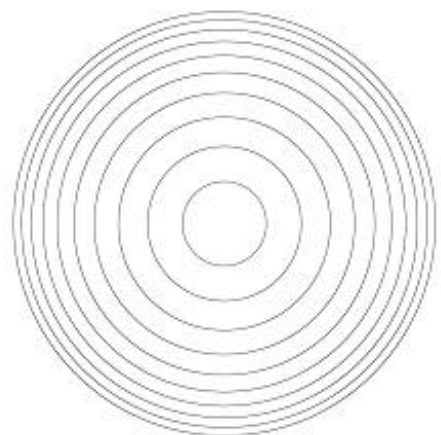

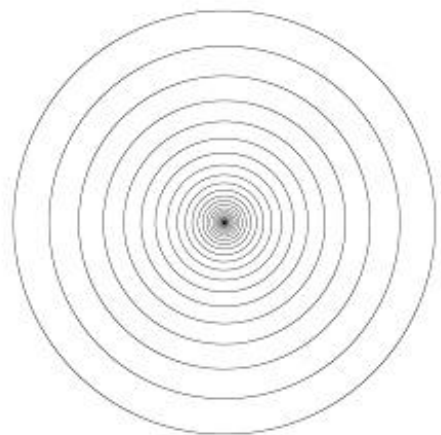

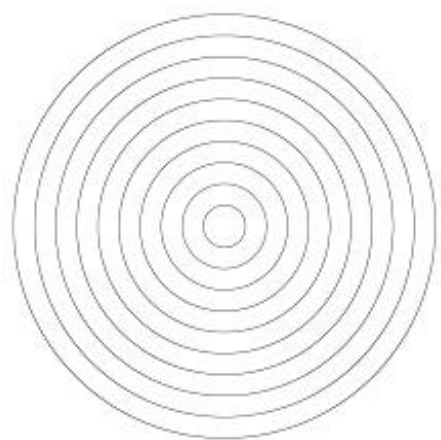

Ley Lines are the meridian axiatonal lines or grid system that conducts and transmits frequencies throughout our bodies and the planet. They are an exact mirror as they exist in our personal holographic template and are reflected from within the larger mirror of the planet's own meridian and template system.

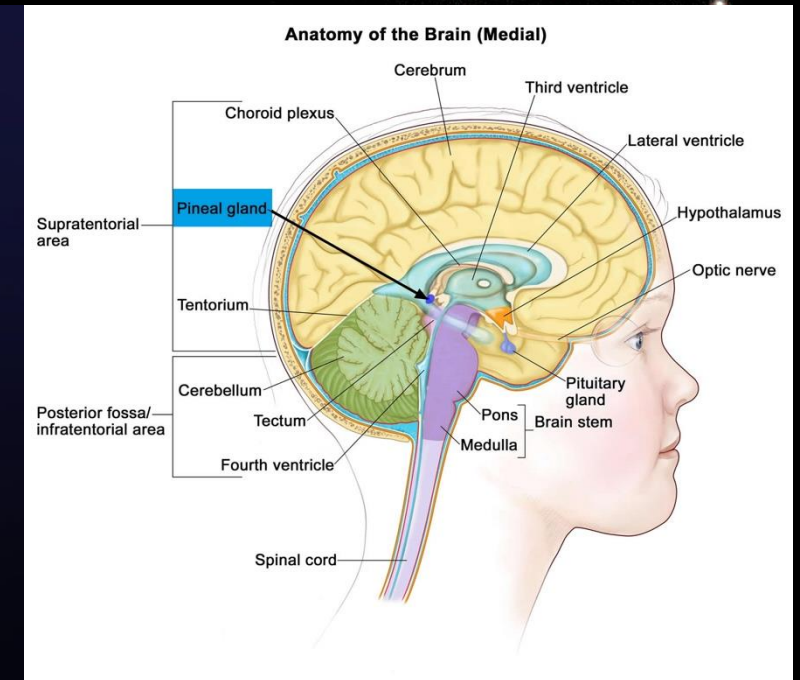

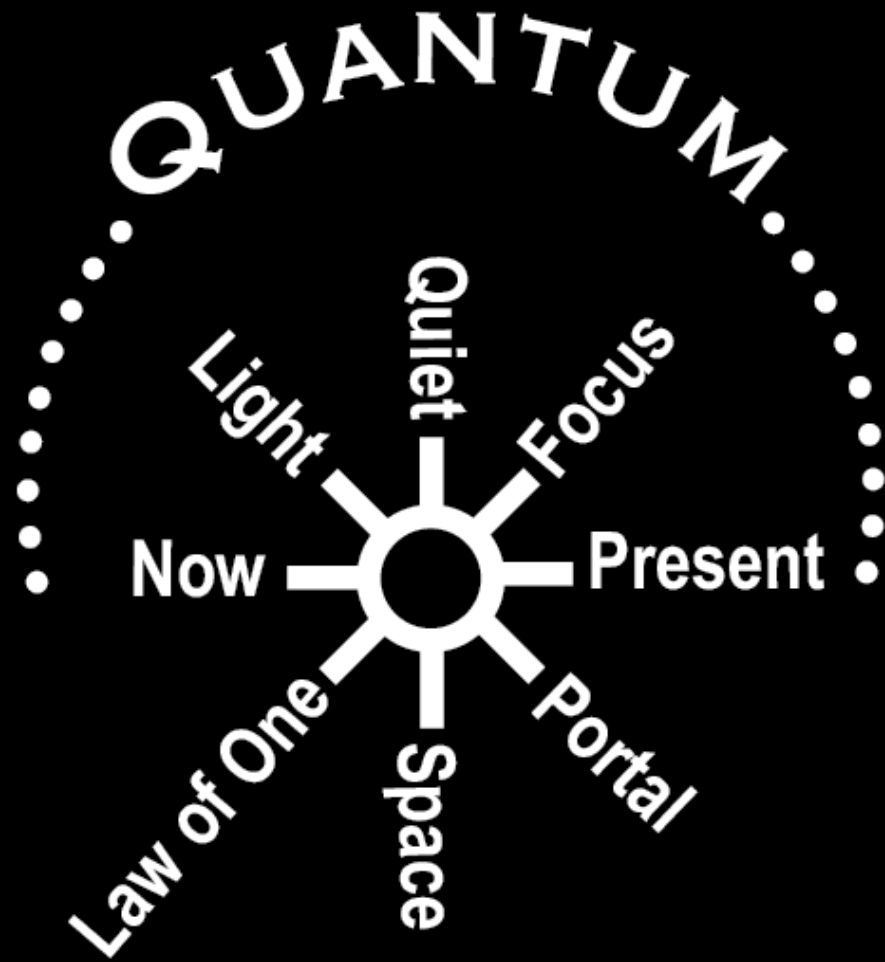

Position of the Upper Dantian

Energetic synthesis Spectrum of Frequency

Awareness of our Lightbody, the Human Energy Field and Spectrum of Frequency supports the beginning of understanding that all and everything around and within us is an Energetic Form and Vibratory Quality and Rate of Frequency. In our Ascension model we recognize and work with 15 Wave Spectrum of Frequency that correlate directly with the Universal Rays (See the Universal Time Matrix) and our individual Chakra systems.

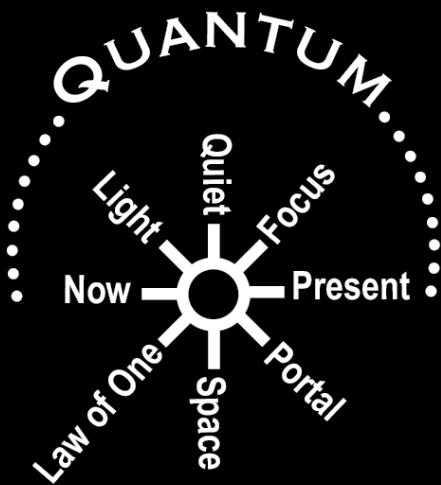

We are Pure Energy and Consciousness and with that there are very specific locations within our Lightbody that an individual's choice of expressing emotion, thought, memory and experience all contribute to the manifestation of experience and form into physical matter. This will help us to become self-sovereign within our personal power and responsible manifestors in the world of form thus experiencing a much greater range of joy and fulfillment in the unlimited possibilities of co-creation.

Rate of Frequency

Energy is Consciousness and it either contracts or expands to maintain or increase its Rate of Frequency. The process of how fast or slow energy contracts back towards its center point of source field is the Vibration rate. The process of how fast or slow that same energy expands away from the center point of the source field is the Oscillation rate. The combination of both the pattern of Vibration (contraction) and Oscillation (expansion) speed is what determines the Frequency rate of all energy and things. As our personal, collective and planetary consciousness raises frequency, the matter world, including our physical bodies, also becomes less dense as our Frequency increases.

Oscillations and vibrations

- Vibrations and oscillations occur all the time and are everywhere.
- Vibrations are physical evidence of waves, such as a loud stereo shaking a table, i.e. sound waves cause *vibrations*
- One complete movement from the starting point or rest point or equilibrium position and back to the starting point or rest position or equilibrium position is known as an *oscillation*
- The time taken for one complete oscillation is referred to as the period T of the oscillation
- The number of oscillations per unit time is the frequency f

Oscillatory motion

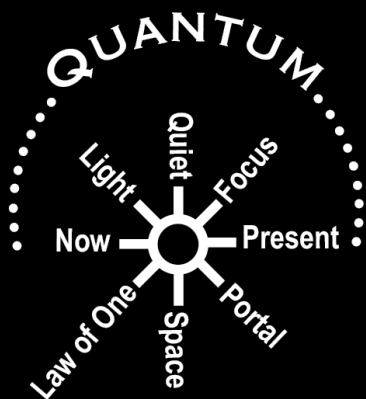

Rad 5 – Radionics Machine

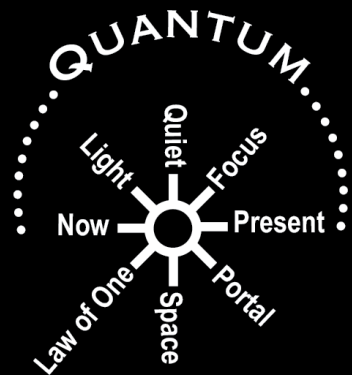

Radionics is a method of creating “action at a distance”, sending frequencies through the quantum field via scalar waves which are the same type of waves created by our brains. Whilst working with radionics I utilize electronic devices called Orgone generators, which produce a constant stream of orgone (or chi). I work with crystals, Gendai Reiki and other shamanic practices in conjunction with the machines to enhance the frequencies and accuracy of what is being created.

As a witness to the chi generated by the Orgone devices, sensing it in my body and spirit with focused meditation, I believe it is possible to create an experience or manifestation of chi at a distance for clients - those who are willing to be open & dedicated to personal transformation seem to be able to receive the most positive results from this service. In this state of openness and curiosity I believe we can be ready to release imbalances, blockages and stagnation of any form that prevent us from being in our purest, most vital state of creativity and inner power. Giving ourselves a chance to experience vibrance, balance, peace and harmony in our everyday lives.

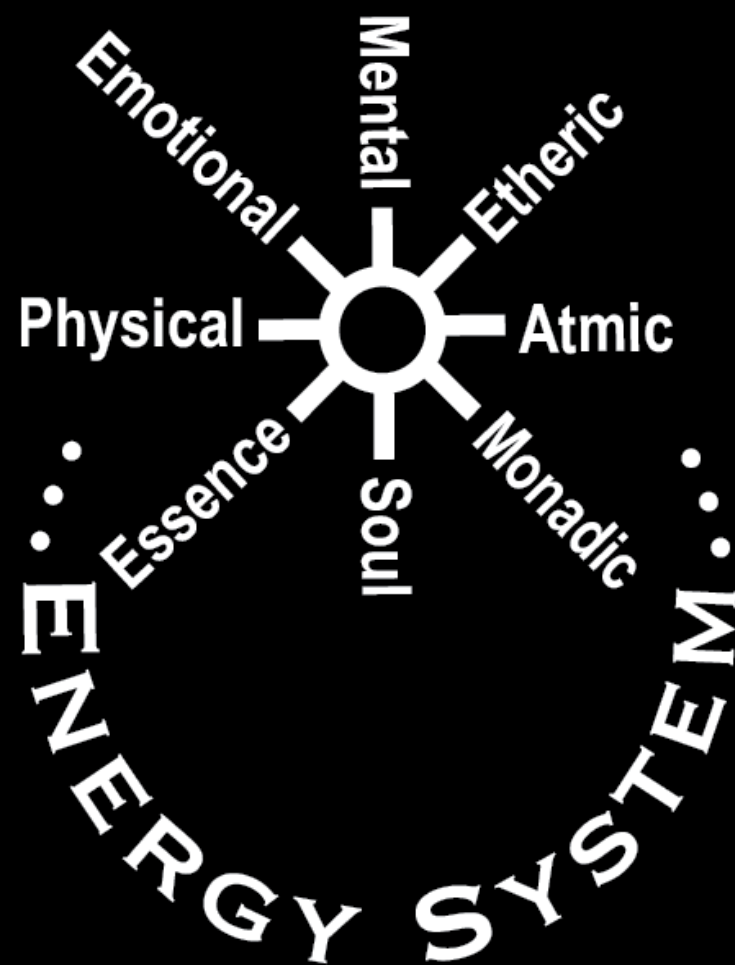

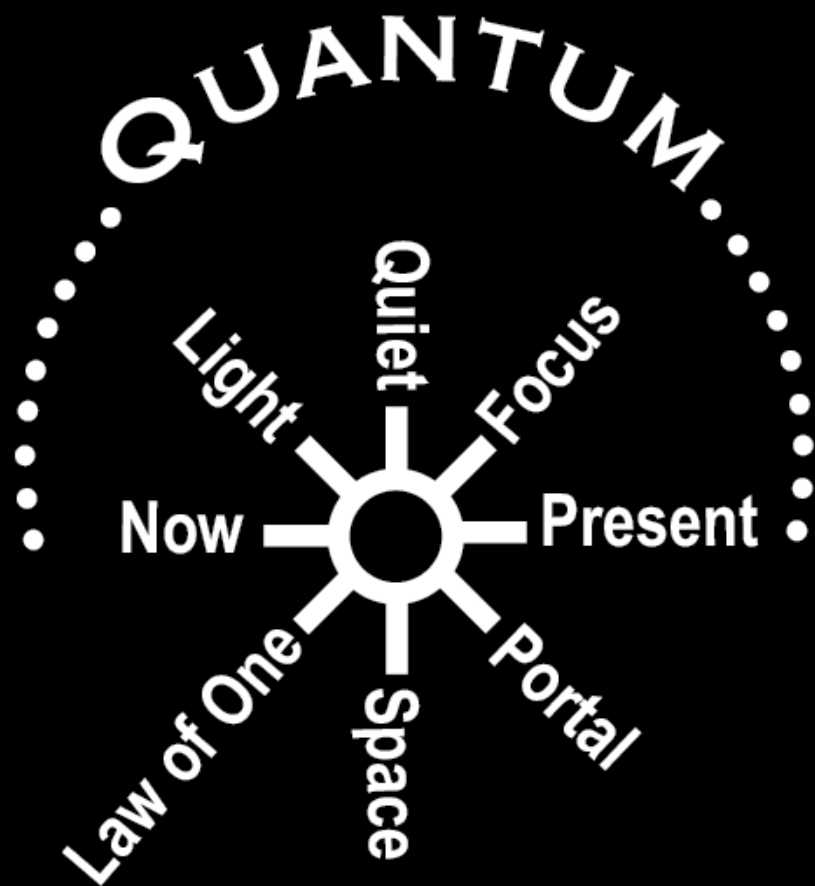

Pinky the Sheep

- Neurological disease &
- Infestation of Protozoa in intestinal tract
- Physical test of poop
- Protozoa Results very high
- Unable to give medication orally
- I put medicine on the RAD 2000 with wool Sample For 1 month
- Two more physical tests of poop at 2 weeks and after 6 weeks he was free of protozoa
- No other medication given

RAD 2000 – Singular setting Radionics machine

Lisa Renee – Energetic Synthesis

**AFFIRMATION:
I AM GOD!
I AM SOVEREIGN!
I AM FREE!**

Our Sacred Crystal Heart will lead us to safety and it will make the best choice for us at any given time, if we can quiet the mind and indeed listen to it. The crisis humanity is facing is the crisis of consciousness that is generated from a lack of love and from closed down hearts, as well as a lack of self-awareness to know what deeply motivates our behaviors. Through the opening of our **Sacred Crystal Heart**, we also gain increased knowledge of health through sustaining energetic balance, which serves as the healing force we transmit to become the true agents of spiritual healing in this world.

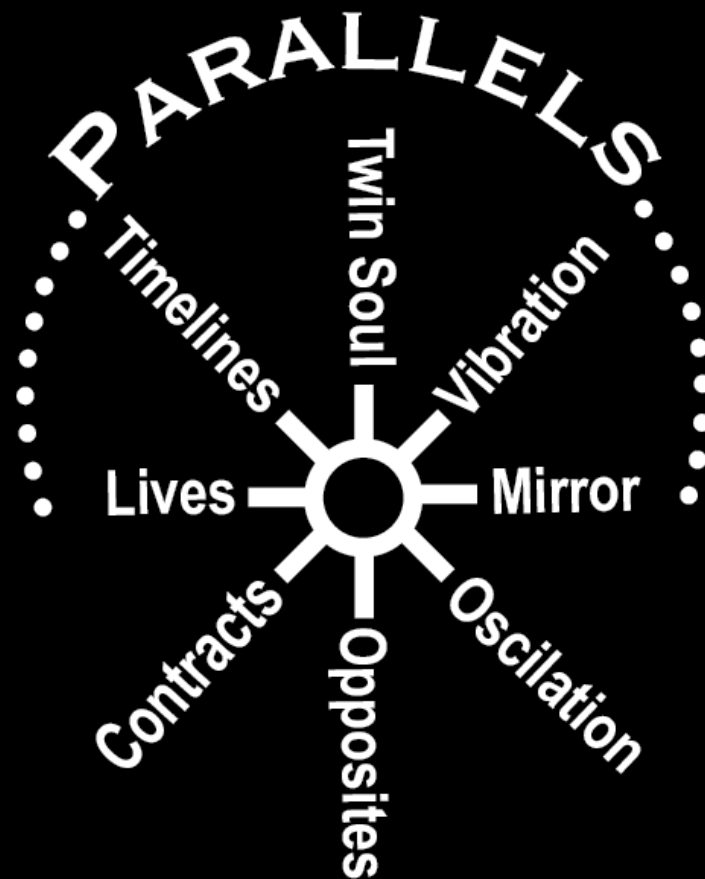

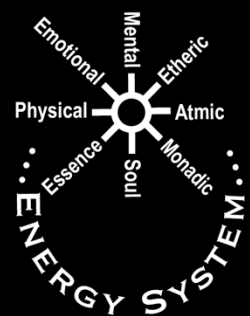

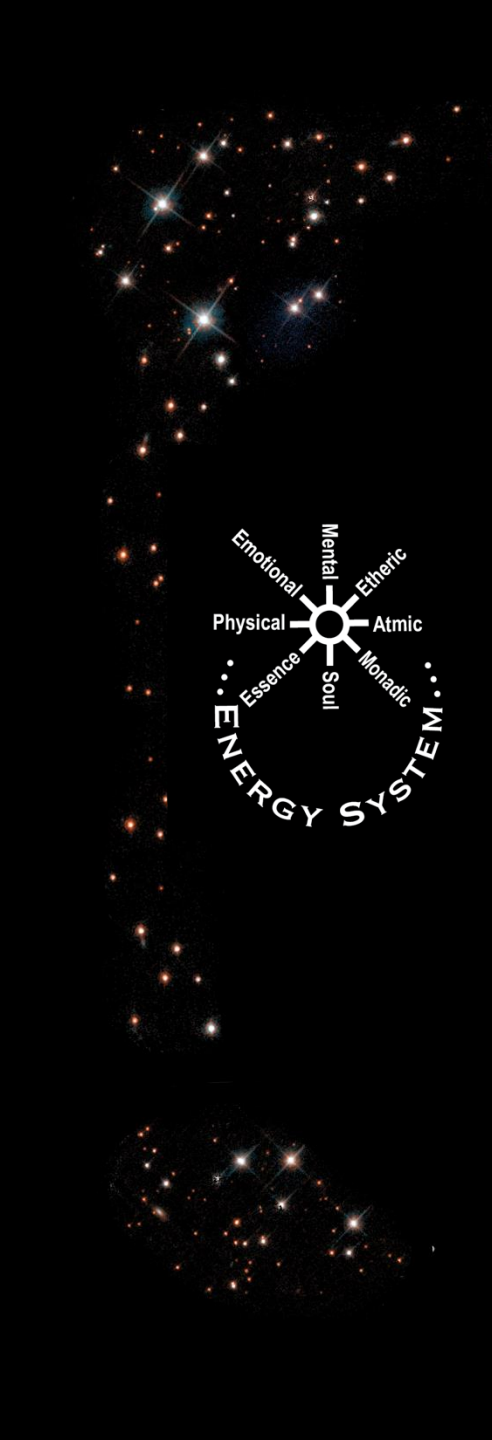

The forces of love are one with the Eternal God Spirit that resides within our **Sacred Crystal Heart** and are without exception, the strongest healing and harmonizing forces available on this planet. By finding the true love that exists from within the self, the crystal heart complex is activated from within the lightbody which is further designed to attract and embody the highest qualities of soul-spiritual intelligence.

The Universal **Law of Correspondence** shows us that which is expressed from the inner world, is matched in what expresses in the outer world, and vice versa. On the spiritual path, our ultimate goal is to express more balance and symmetry between the layers of correspondence that we become aware of. The principle expresses the idea that there is always a correspondence which can be observed in patterns between the Natural Laws of consciousness that exist simultaneously in the multiple dimensional planes of being and life. As above, so below; as below, so above. What is manifested in the material world, reflects the quality of the thought behind the pattern from the unmanifest layers. This principle also states that there is a correspondence between multiple planes of reality which may form into integrated and harmonious interactions delineated as: the physical, mental, emotional and spiritual planes, at the individual (microcosmic) and collective (macrocosmic) levels.

If we want to understand more about the causal reality and events happening around us, we look at the macrocosm to the microcosm, and the microcosm to the macrocosm and we observe the interconnections and patterns that are present there. To understand the nature of problems and life lessons, we look beyond the linear thinking of the issue. Instead we look at what exists in the energetic layers that created it, to see the patterns and the shadows of what generated that situation.

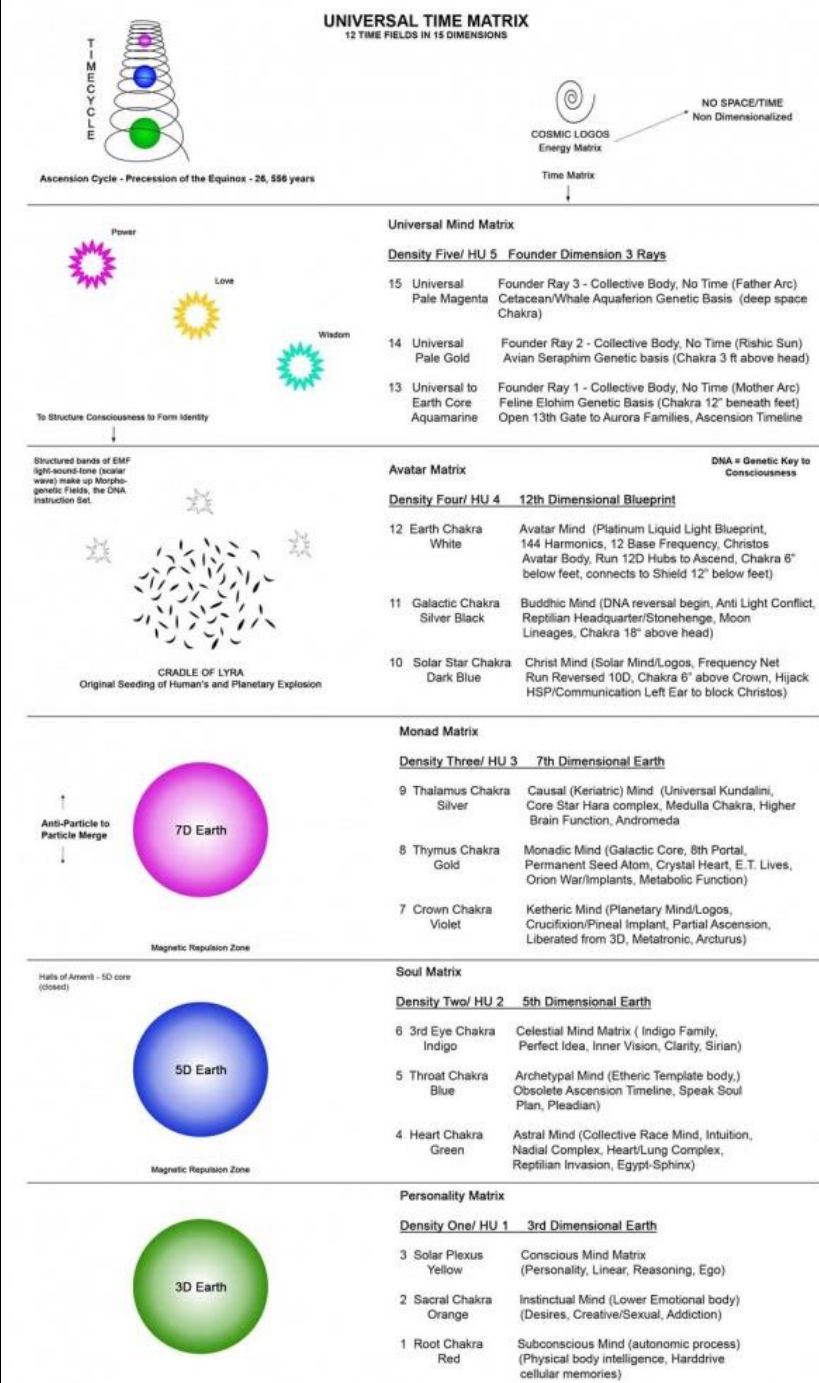

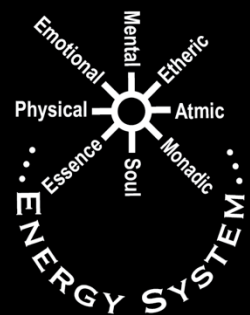

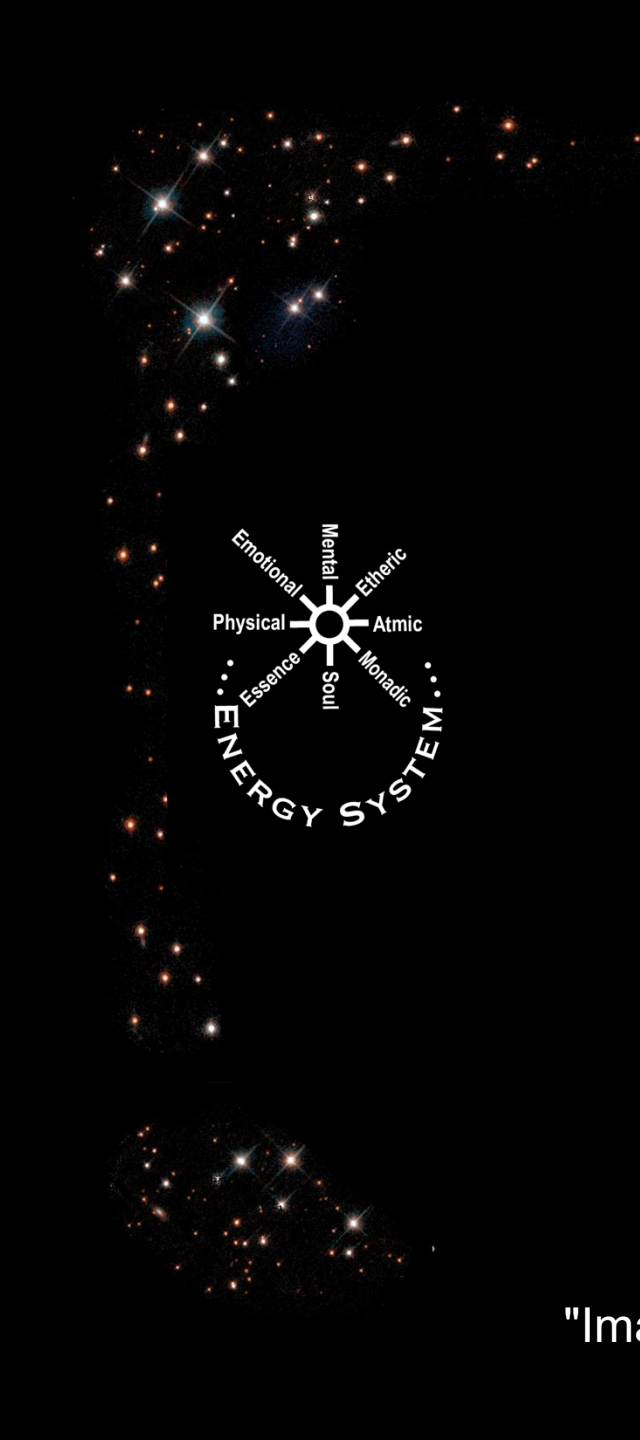

If we want to see the accumulated thoughtforms that have created an organization, if we want to reverse engineer something that has manifested, we look for the correspondences. We look at how that thing was created by observing the macro to micro patterns, the influence of the system of energy that was co-created, and the motivations that are behind it. The **Law of Correspondence** informs us of the original intent and quality of thoughtforms that were used to co-create a manifestation, in which we can observe causality through the mirror of reality. In this way, it is very similar to the basic comprehension of the Law of Attraction.

Tomorrow Never Knows – The Beatles from The White Album

Turn off your mind, relax and float down stream
It is not dying, it is not dying

Lay down all thoughts, surrender to the void
It is shining, it is shining

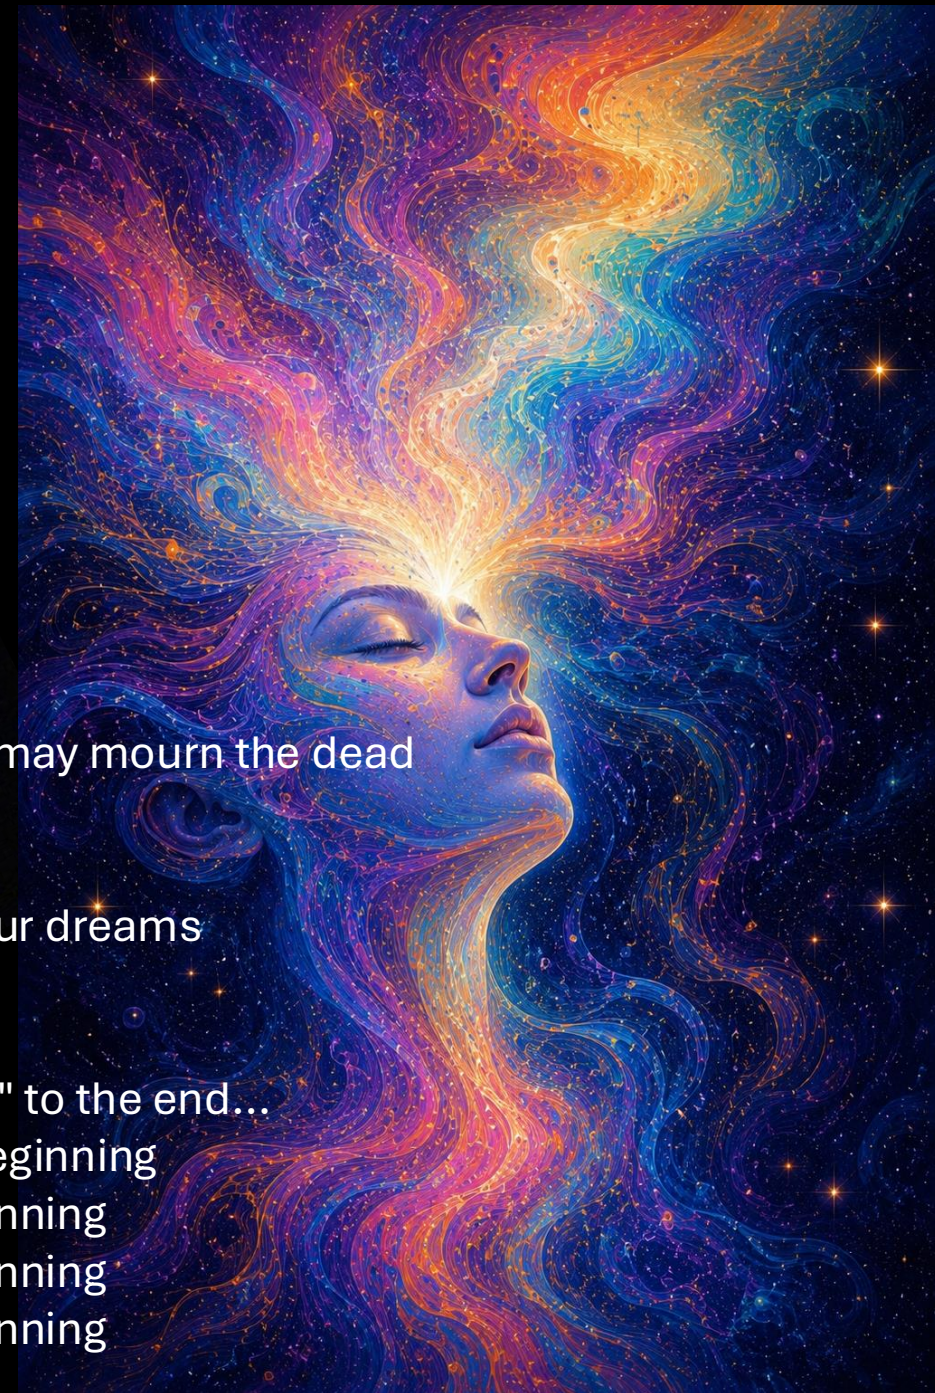

Yet you may see the meaning of within
It is being, it is being

Love is all and love is everyone
It is knowing, it is knowing...

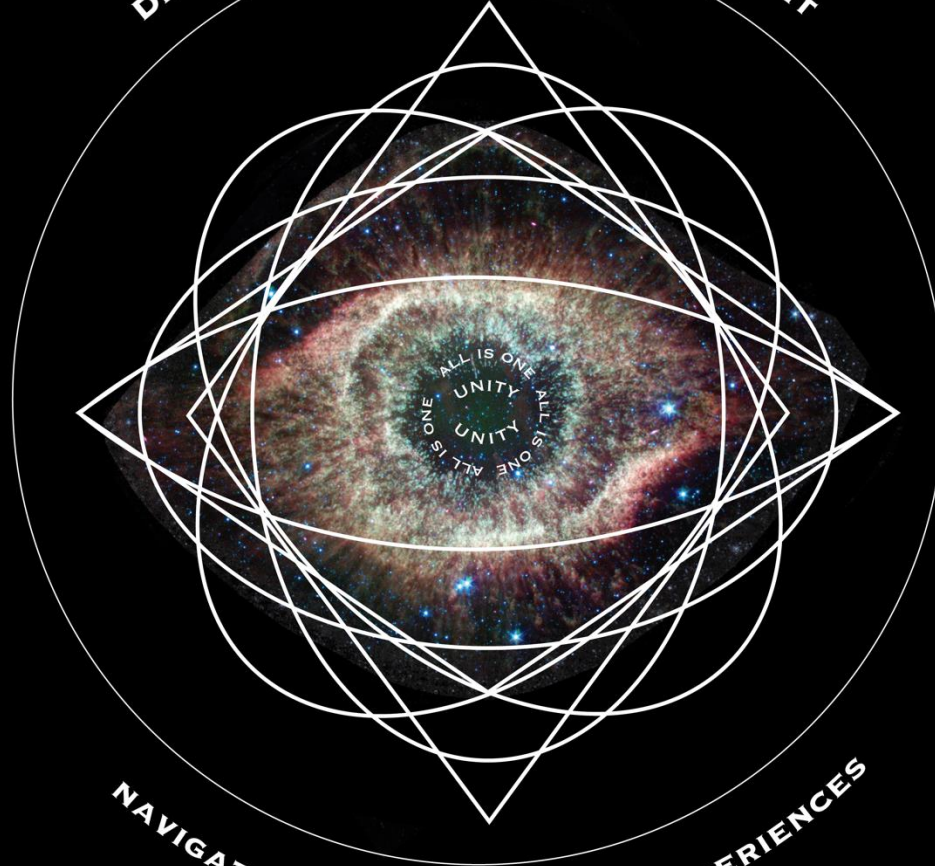

... that ignorance and hates may mourn the dead
It is believing, it is believing

But listen to the colour of your dreams
It is not living, it is not living

So play the game "Existence" to the end...
... Of the beginning, of the beginning
Of the beginning, of the beginning
Of the beginning, of the beginning
Of the beginning, of the beginning
